

Yes! Permits for driveway connections can be applied for through the Public Works Department. Requests for driveway connections to a single family residence on any and all County maintained roads can be made by filling out the required form. If the proposed connection is for a commercial, retail, or multi-family location, please contact the Public Works Engineering section at 689-5772 to determine whether a driveway permit or development review is required.

Please go to the Engineering [ROW](#) page for more information.
