Website Update Allows for Search of Okaloosa County Inmates

Due to a recent computer software upgrade to the Okaloosa County Jail Inmate Management System, detailed inmate information is now available with the click of a mouse. A search for an inmate can be done by name, booking date and release date. A current list, as well as inmate histories and photos, can also be accessed.

The upgrade also establishes the ability for information to be exchanged between the Jail and the Sheriff's Office. Okaloosa County Information Systems, the Sheriff's Office and Corrections, along with the Archonix software worked together to make this happen and minimize overall costs. Inmates can be searched by visiting www.okaloosafl.com, select Corrections Department and select inmate search. For a direct link:
