Heavy Equipment Demolition at Garnier's Plant Scheduled Next Week

Heavy demolition of the concrete structures will begin the week of June 13, providing there are no delays in the arrival of the equipment. The County intends to keep noise and dust under control as much as possible throughout the project.

Equipment rental contracts were approved on Tuesday, June 7, 2011 during a regular meeting of the Okaloosa Board County Commissioners. Okaloosa County Water and Sewer crews continue the removal of salvageable materials from plant, and this phase of the project is approximately 80% complete. The sale of these materials will help fund the demolition process.

Final "grading and grassing" remains on schedule for the October 2011 timeframe. For more information, contact the Citizens Information Line at 311 or Water and Sewer direct, (850) 651-7171.
